To BYPASS a zone if alarm won't set (DSC - LCD Codepad)

If the alarm will not set and is not showing a green ready light
Check for an open zone:

1. Press ***1** to enter the function menu
   (put in user code, if required)

2. Use the **< >** keys to find the zone to be bypassed
   Look for an **O** to the right of the zone name/number

3. Press ***** to select the zone
   The **O** will be replaced with a **B** (Bypass)

4. Press **#** to exit the bypassing mode
   The green light should show ready to set system
